Muhamad Amir Azmi

Front End Web Developer

👤 Profile

It's been a year I'm becoming a Front End Web Developer at my current company and still, I'm really passionate on creating and developing web applications.

Outside of my working hours, I took extra effort to learn more on web development and currently seeking new workplace to try out my new skill set and gain more experience at other place.

💼 Employment History

Front End Web Developer at REKA Studios, Kuala Lumpur

June 2020 — Present

- Maintain, clean up and write documentation for existing code base.
- Develop new features and fix bugs.
- Implementing web security.
- Exploring latest and stable web technologies to be used in projects.

📊 Projects

Personal Project Site

This is my latest personal project site, accessible through amirazmi.site.

- Using ReactJS to build the UI for the site.
- This portfolio intended to showcase my current skill in ReactJS. But still not complete yet.

HairMess

This is barber marketplace which is my latest personal project that still on going. I should not put this thing yet because there is not really workable.

- This project can be accessible through dev.amirazmi.me/hairmess.
- Just an UI for barber listing. I do this project on my free time.
- Using ReactJS, Bootstrap 5.

CoupleChat

- This project is to create personal chat application through web apps and PWA.
- Accessible at dev.amirazmi.me/couplechat.
- The authentication and backend for this project using BaaS Firebase from Google.
- Front end of this project using ReactJS and TailwindCSS
